

MusiCALL

Music & Message

**Complete multizone
audio
in one system**

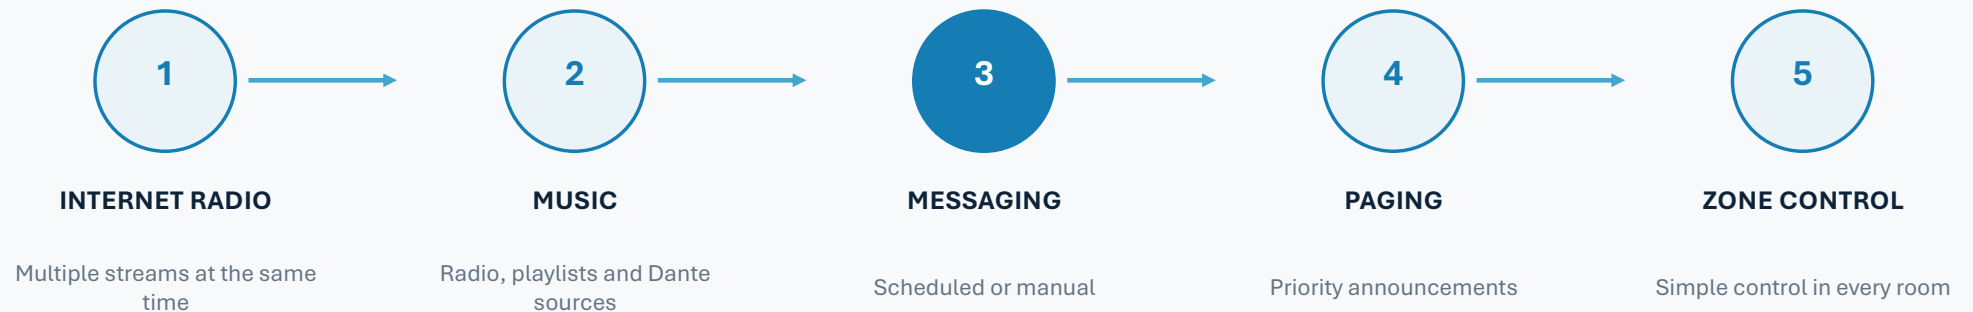

Internet radio • Music • Messaging
Dante • Local control

Powerful for the user, simple for the installer

One system for the complete audio installation

From source to zone control: everything integrated into one platform.

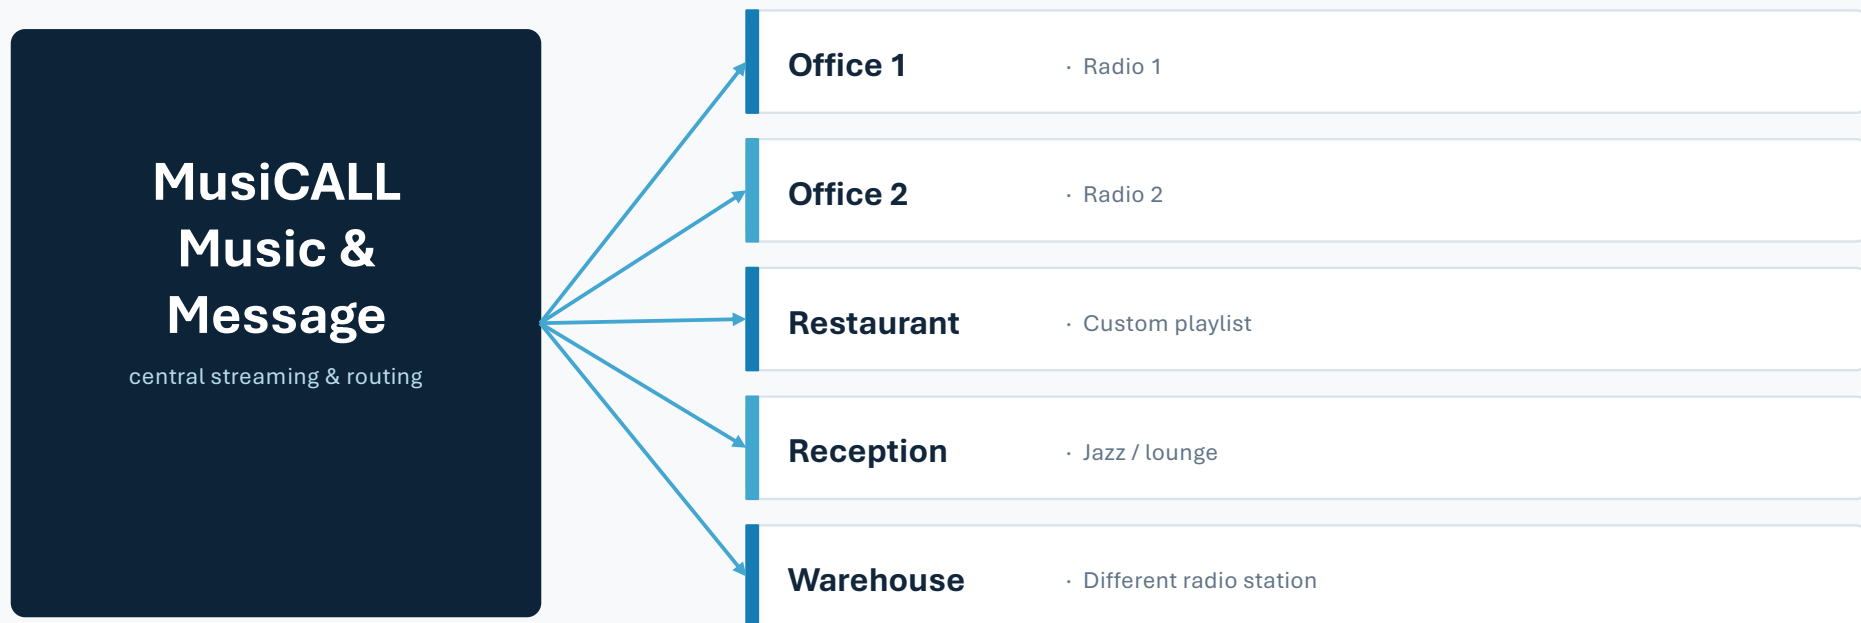

Less hardware. Less configuration. More possibilities.

BUILT-IN INTERNET RADIO

One system. Many stations. Independent zones.

No separate internet radio players needed in each room.

Each zone only shows the sources and radio stations relevant to that room.

LOCAL CONTROL

Only the functions the user needs

Select a source or radio station and adjust the volume, without complicated menus.

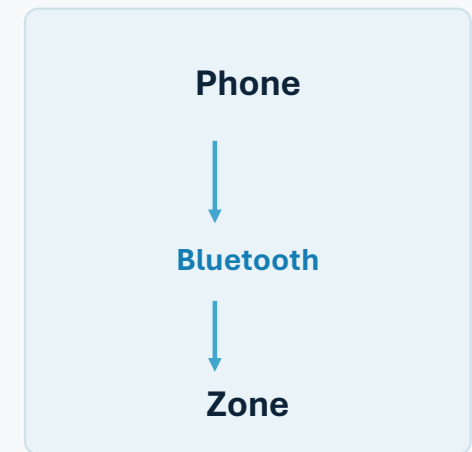

Simple to use

- Clear display
- Rotary push control
- Relevant sources only
- Configurable per zone

LOCAL BLUETOOTH

Your own music? Press Pair.

A local Bluetooth source becomes part of the central Music & Message system.

More than background music

Pre-recorded audio can be sent automatically or manually to the correct zones.

SCHOOL

Class times and school bell

RETAIL

Promotions and commercial messages

OFFICE

Break and closing times

MUSEUM

Information segments

HOSPITALITY

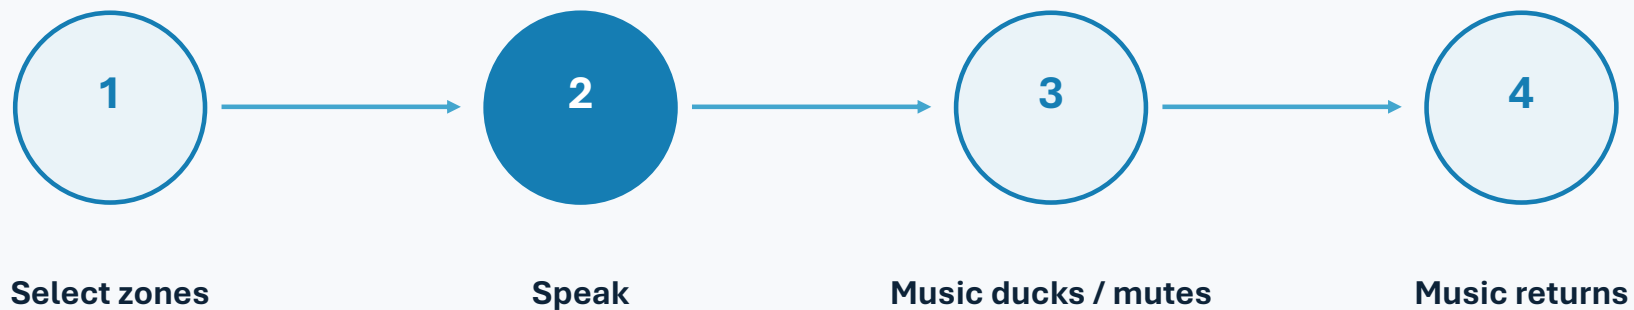

Announcements and ambience content

Messages can be played with priority over the music.

PROFESSIONAL PAGING

One zone, a group or the entire building

Select the destination, speak and let the system handle the rest.

Priority paging

Zone groups

Optional chime

AUTOMATION

The system works even when nobody thinks about it

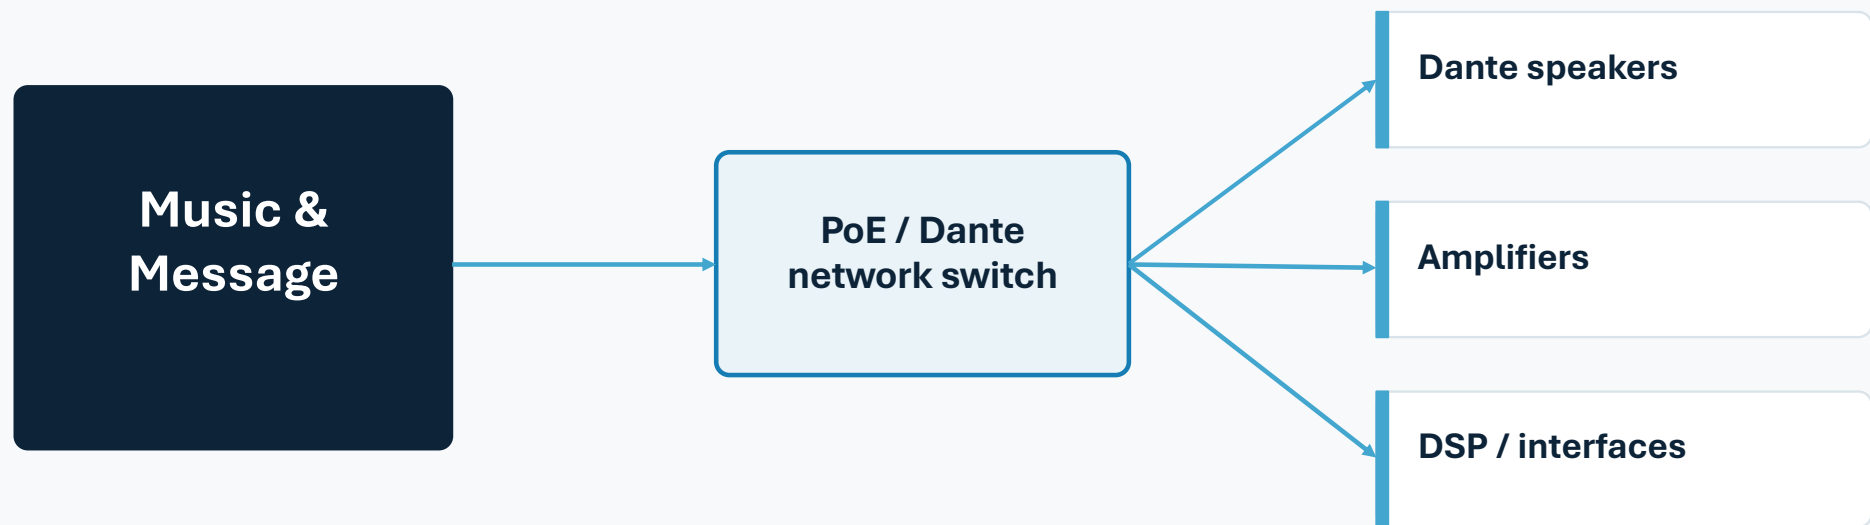

Schedule music, messages and zone behaviour in advance.

Automatic start and stop can also help prevent unnecessary energy use.

Professional audio over the network

Dante makes the system flexible, scalable and easy to expand.

Less cabling

Digital audio quality

Flexible routing

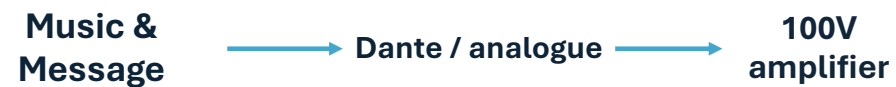

Easy to expand

INTEGRATION

From an existing 100V installation to full Dante

Modernise without replacing everything at once.

EXISTING INSTALLATION

Existing loudspeakers remain in use

FULL DANTE

Network cabling carries audio and can supply PoE

SCALABLE

From a few zones to large installations

The same user concept, regardless of system size.

PRODUCT OVERVIEW

MusiCALL Music & Message servers

Three versions for different control, mounting and zone requirements.

MDM-H SERIE

Compact headless server controlled from an external monitor or touchscreen.

MODELS

MDM-H2 · H4 · H8
MDM-H16 · H32 · H64

MDM-T SERIE

Desktop model with integrated 10.1-inch touchscreen for central control.
An optional microphone can be added.

MODELS

MDM-T2 · T4 · T8

MDM-S SERIE

4U rack server with integrated 10.1-inch touchscreen for larger systems.

MODELS

MDM-S16 · S32 · S64

APPLICATIONS

One platform for different environments

The same foundation, configured for the functions each location needs.

OFFICES

Individual music selection for each office.

EDUCATION

Music, school bell, messaging and paging.

RETAIL & HOSPITALITY

Background music, internet radio and messages.

PUBLIC SPACES

Many zones, central control and integration.

Hotels • Restaurants • Shops • Offices • Schools • Museums • Healthcare • Leisure
